

Agronomic Tillage Systems

Better Tillage Systems!

NITRO 2000

- Multiple products
- Vertical rate application
- Endless configurations
- Multiple horizons
- To fit various tine shanks
- Precision seeding & fertilizing

PATENT NO.2016900141

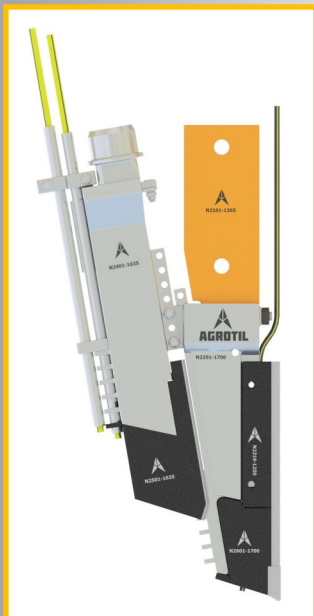

Agronomic Tillage Systems

NITRO 2000

Is a modular multiple application tine system which can be retro-fitted to any toolbar and is configurable for almost all precision in furrow applications.

**Pre-plant Fertilizers /
Nutrients / Soil Conditioners**

**Seeding + Fertilizers / Nutrients
/ Soil Conditioners**

Agrotil is a innovator in tillage systems design and manufacture.

A highly skilled team of industry specialists and engineers work constantly to overcome common problems and issues identified within agriculture everyday.

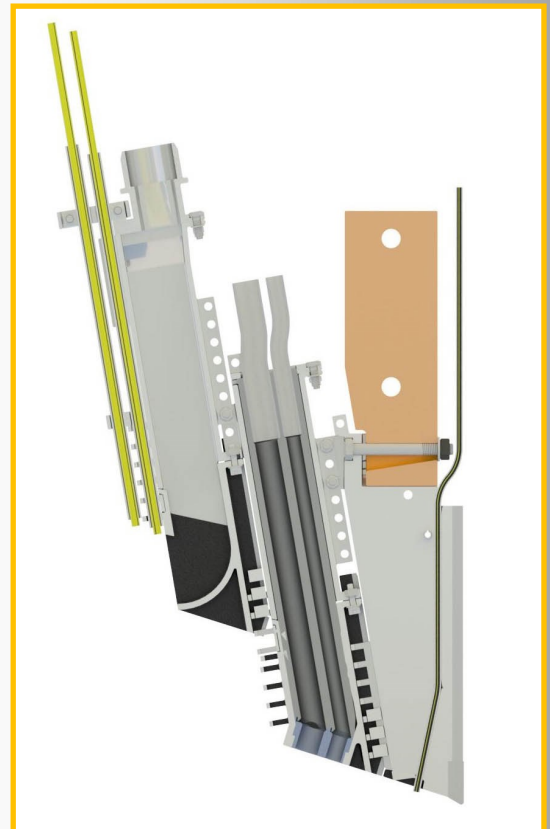

A subsidiary to the BLAST Group who deliver quality castings production and assembly, Agrotil has already gained global acknowledgement for what has been described as *"simply better tillage systems"*.

Common Features

- ◆ Adjustable depth Outlets — 75mm (3") @ 12.5mm (1/2") increments
- ◆ 1 or 2 rear Liquid Tubes optional on all configurations — 10mm (3/8") OD max
- ◆ Front Liquid Tube -5mm OD Max

OPTIONS

- ◆ Seeding with Liquid/solids
- ◆ Insulated side wing NH3 with seed
- ◆ Insulated inline NH3 with seed
- ◆ Rear liquids with spray nozzles over seed
- ◆ 4 Liquids rear variable depths
- ◆ Insulated fertilizing Knives
- ◆ Adjustable stubble guard
- ◆ Various upper shank options
- ◆ Dual wing Shank options

**Nitrogen + Seeding + Fertilizers /
Nutrients / Soil Conditioners**
